Added \$25,480/mo in revenue for my last client. The Financial Impact of My Work:

→ \$25,480/mo Added: AI email responder (Boosted conversions 341%).

→ \$15,064/mo Protected: CRM/Slack sync (Zero missed follow-ups).

→ \$8,176/mo Pipeline: AI lead scraper + personalized icebreakers.

→ \$3,274/mo Saved: Auto-proposals (Reclaimed 40+ hours/mo).

How I Generate These Results:

1. The Revenue Engine (AI Email Auto-Responder): I replaced a manual triage process with an AI system that filters spam, checks ICP fit, and sends an instant booking link.

The Result: Reply time dropped from hours to seconds. It didn't just save time; it closed deals that would have gone to competitors.

2. The Deal Guard (Calendar-to-CRM Sync): I build systems that ensure no lead is ever forgotten. When a lead books, the CRM is updated and Slack is pinged instantly.

The Result: \$15,064 in monthly deal value is protected from human error and "administrative amnesia."

3. The Growth Engine (AI Lead Scraper): I build intelligent scrapers that don't just find emails, they find context. My systems parse websites with AI to write personalized icebreakers for every lead.

The Result: 100+ hours of manual research eliminated and a consistent \$8,176/mo in new pipeline.

4. The Overhead Killer (AI Proposal Generator): I turned a multi-hour manual task into a 30-second automated flow using Google Forms and Slides.

The Result: Sales reps spend their time selling, not copy-pasting. This reclaimed \$39,288/year in internal labor costs.
