

Debanjan Mazumdar

Senior Product Manager & IT Program Lead — GenAI-assisted development | 15 years in software delivery & digital transformation | Hands-on with agentic, specification-driven AI tooling

debanjan186@gmail.com • +33 7 55 80 76 58 • Paris, France • [linkedin.com/in/dmazumdar](https://www.linkedin.com/in/dmazumdar) • github.com/dmazumdar186 • prodcraft.fyi
Immediately available for consulting missions — Paris area (hybrid)

Senior product and IT delivery leader with **15 years** across US-headquartered B2B SaaS (retail-tech / digital commerce, healthcare, logistics, communications) and distributed US–EU–India teams. At Wiser Solutions (since 2022), has led the **global Generative AI program** end-to-end: consolidated fragmented, team-by-team AI usage into one shared AI infrastructure, and owned the roadmap and OKRs, a **\$150K program budget**, go/no-go steering reviews with the CPO and BU leads, release gates and adoption / value KPIs — delivering **+40 % BU adoption and +20 % CSAT**. Builds production software daily with **agentic, specification-driven AI development tooling** (Claude Code, AI SDLC), so can align architects and engineers on their terms and management on theirs.

Impact: 5 multidisciplinary squads coordinated across Paris, US and India • +45 % feature adoption and –55 % p95 latency on GenAI capabilities • 12+ AI products shipped, <30-day median

PROFESSIONAL EXPERIENCE

Senior Product Manager, AI & Data Intelligence — Wiser Solutions

US-headquartered global enterprise SaaS · Retail & Digital-Commerce Intelligence · Paris | Nov 2022 – Present

- **+40 % BU adoption and +20 % CSAT** on the company's global Generative AI rollout — as program lead end-to-end: program scope and implementation roadmap, OKRs, a **\$150K program budget**, go/no-go steering reviews with the CPO and BU leads, rollback plans, and a usage / quality / drift KPI dashboard used for executive reporting and decision support.
- **5 cross-functional squads** (Product Managers, Product Owners, architects, engineering, data and privacy) coordinated on one prioritized roadmap across Paris, US and offshore teams — through influence, without formal authority over any squad — as the escalation point for delivery risks, dependencies and business-vs-technical trade-offs.
- **+45 % feature adoption and –55 % p95 latency** on GenAI capabilities (triage, recommendation, RAG support, smart alerting) — delivered through PRDs with acceptance criteria, data-readiness checklists, API contracts and LLM evaluation thresholds; GDPR / privacy-by-design and vendor-API (OpenAI, Anthropic) spend tracking and cost controls built into the release gates.
- Consolidated fragmented, team-by-team AI usage into **one shared AI infrastructure and set of shared practices** across the BUs — the change-management core of the program: playbooks, sprint coaching and a continuous-improvement loop on adoption metrics; the new ways of working (DoR/DoD, pre-prod QA, phased rollouts with feature flags and A/B tests) cut **in-sprint ambiguity –25 %** and lifted **delivery precision +25–30 %**.

Founder & Lead Consultant — ProdCraft (AI Product Studio)

GenAI-assisted software engineering practice · Paris (independent, alongside Wiser) | Jan 2026 – Present

- Operates a **specification-driven, agentic AI SDLC** on Claude Code — 80+ directive specifications, **1,100+ automated tests**, static-analysis, review-agent and git-hook quality gates — and has shipped **12+ AI products at a <30-day median** (0 → live) with it, including a live multilingual CV-optimizer SaaS and a GenAI roleplay-coaching app; codebase public on GitHub.
- Packaged the practice as an **adoption & enablement kit** for AI-assisted software engineering — engineering rules, reusable playbooks, an LLM cost-routing and estimation policy, and a multi-auditor release gate (front-door synthetic, output acceptance, LLM audit loop, test suite, adversarial review) — the operating model behind every current ProdCraft delivery, offered as a reference implementation for engineering-team rollout (single-operator scale to date).
- **\$1M+ qualified pipeline** and **~\$200K/yr** of SDR cost replaced for a high-velocity outbound consultancy — by taking an autonomous outbound product from discovery to launch, with dry-run modes, health endpoints and synthetic canaries on every paid path; all code and IP handed to the client.

Product Manager, Data & Recommendation Products — InfoTnT

B2B SaaS · Paris | Jun 2021 – Nov 2022

- **–35 % iteration cycles and +25 % post-launch product-market fit** across 3 enterprise clients — by leading structured discovery (interviews, usage analysis, JTBD workshops) and translating it into a prioritized roadmap, backlog and release plan.
- Standardized PRDs and user stories with acceptance criteria, data contracts, API constraints and experimentation playbooks — enabling predictable squad delivery and regression-free releases.

Senior Data Product Owner — Pitney Bowes

US enterprise SaaS · Shipping & Logistics · Pune | Apr 2019 – Sep 2019

- **-20 % time-to-market** — by mapping cross-squad dependencies, clarifying exit criteria, tightening Scrum cadence, and running structured **RAID (risk, assumption, issue, dependency) reviews** and pre-prod checklists.

Senior Data Product Owner — Evolent International

US healthcare SaaS · Pune | Jun 2018 – Feb 2019

- **+30 % platform scalability and performance** — by introducing SLA/SLO frameworks to arbitrate run-vs-change priorities and embedding governance and QA checkpoints into the delivery flow.

Senior Product Owner, Communications Platform — Avaya India

US enterprise software · Pune | Jul 2015 – Mar 2018

- **+30 % delivery velocity and -25 % requirement instability across 3 squads** — by strengthening Scrum discipline, structured sprint reviews and OKR ↔ roadmap alignment with US and India stakeholders.

QA Engineer & Release Coordinator — IDrive India

Cloud backup software · Bengaluru | Apr 2013 – Jul 2015 — QA and release management for a distributed storage platform

Software Engineer — Tata Consultancy Services

IT services · Bengaluru | Nov 2010 – Mar 2013 — foundations in distributed systems engineering

SKILLS

Program Leadership :	IT Program Management • Digital Transformation • Deployment Roadmap & OKRs • Governance Framework (go/no-go steering reviews, release gates) • Risk & Dependency Register (RAID), Risk Mitigation • Executive Reporting & Decision Support • Program Budget Tracking (incl. vendor / LLM spend) • Change Management, GenAI Adoption Strategy & Planning • KPI & Value Measurement • Vendor & Partner Coordination • Communication & Facilitation (workshops, playbooks, sprint coaching) • Data-Driven Decision Making
Agile & Delivery :	Scrum • Kanban • Product-Oriented Delivery Models • OKRs • Roadmap & Backlog Prioritization • PRDs & Acceptance Criteria • DoR/DoD • Release Gates & Rollback • Cross-Functional Coordination • Dependency Management • Pre-Prod QA • Continuous Improvement
AI-Assisted Engineering :	AI-Assisted Software Engineering Tools (Claude Code — agentic development; GitHub Copilot-class assistants) • AI SDLC • Specification-Driven Development • Generative AI Deployment (global rollout) • LLM Evaluation Frameworks • RAG • Multi-Agent Systems • MCP • LLM Cost Governance
Governance :	GDPR / Privacy-by-Design • Security & Access Control • Audit Trails • Responsible AI • Regulatory Compliance
Tools :	Jira • Confluence • Notion • Miro • Figma • Mixpanel • Amplitude • SQL • Python • Git / GitHub • Cloudflare Workers • Modal • n8n • GenAI APIs (OpenAI, Anthropic, Google)

EDUCATION

MSc International Strategic Business

Toulouse Business School, Paris | 2019–2021

BE Information Technology Engineering

CMR Institute of Technology, Bengaluru | 2006–2010

LANGUAGES

English : Bilingual (C2) — daily working language • **French** : Bilingual (C2) • **Hindi** : Native • **Bengali** : Native

SELECTED PROJECTS

- **AgentUp** (live) — GenAI roleplay-coaching app for call-center agents, built specification-first: **75-requirement PRD with full traceability matrix**, streaming LLM with automatic provider fallback, client-side PII redaction, **95 automated tests**; Astro + Cloudflare Pages.
- **CV Optimizer** (live SaaS) — multilingual app that scores a CV against a job description and generates an ATS-optimized CV & cover letter; eval-first build with per-field language and format validators.
- **Two-sided marketplace** (with a partner agency, under NDA) — Stripe Connect payments platform processing **\$85K in the first 3 months**; owned scope, roadmap and partner coordination; React + Node + Postgres.
