Product Owner / Product Manager, **11 years** on data and AI products, the last four on GenAI. Used to sitting between an IT department, business lines and a Data/AI lead: a vague business need becomes a backlog developers can work from, then gets followed through to adoption. Hands-on enough on **LLM, RAG and agents** to challenge a vendor or an estimate. **12+ AI products** delivered, median **under 30 days**. Healthcare and enterprise-software background.

Key figures: **+45%** adoption • **+20%** CSAT • **−55%** p95 latency • **$150K** AI budget owned • **~$200K/yr** cost removed • **5** squads coordinated on 3 continents
